

Your child may have been exposed to:

Yeast

Yeast is a fungus that can cause infection. It is common to have yeast infections of the mouth or throat (thrush) or the diaper area (diaper rash).

If you think your child has a Yeast Infection:

- Tell your childcare provider or call the school.
- **Need to stay home?**

Childcare and School:

No.

Symptoms

Thrush - White, slightly raised patches on the tongue or inside the cheek. Sucking on fingers or thumbs may cause children to develop the infection around the fingernails.

Diaper Rash - Smooth, shiny, red rash with a raised border.

Spread

- Rarely, by touching skin lesions or secretions from the mouth.

Contagious Period

The illness can spread as long as sores are present.

Call your Healthcare Provider

- ◆ If anyone in your home has symptoms of thrush or diaper rash.

Prevention

- Wash hands after touching anything that could be contaminated with secretions from the nose or mouth and after changing diapers. Your child may need help with handwashing.
- Clean and disinfect objects that come in contact with secretions from the mouth or nose and diaper area. Use a product that kills germs.
- Replace bottle nipples and pacifiers after treatment.
