Public Open House for Two Hennepin County Reconstruction Projects

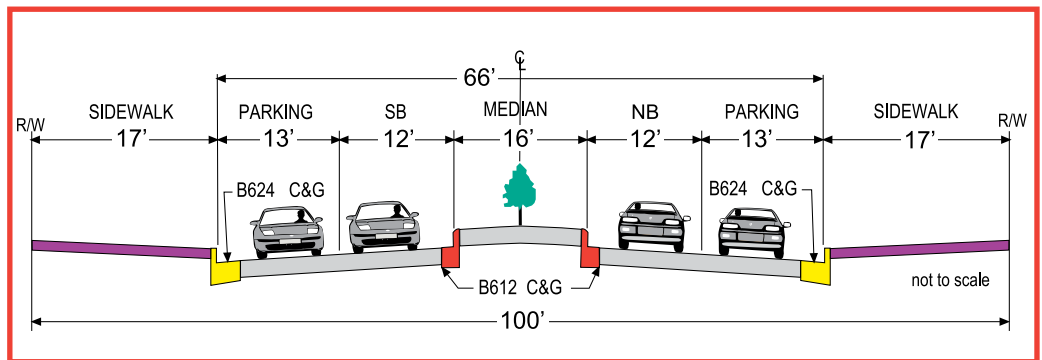

Lyndale Avenue Roadway Reconstruction Project

Hennepin County and the City of Minneapolis are collaborating to reconstruct County State Aid Highway (CSAH) 22 (Lyndale Ave.) from the Minnehaha Creek to West 56th St. in south Minneapolis. The portion of Lyndale Ave. from Lake St. to Minnehaha Creek was previously reconstructed, between 2008 and 2010. Lyndale Avenue is categorized as a minor arterial with a posted speed of 30 mph.

A typical section of the preferred alternative will be constructed within a 100 foot right-of-way (66 feet curb-to-curb) and will include:

a planted center median, two travel lanes, and two parking lanes. Two areas outside the curb faces will be provided for new sidewalks and potential streetscape enhancements. Public utilities impacted by the project (sanitary sewer and watermain) will be replaced and/or updated as necessary. Private utilities (gas, telephone, electric, cable TV, etc.) impacted by the project will be relocated and/or upgraded by the utility owners.

Lyndale Avenue Roadway Typical Section
66 Ft. Curb to Curb – West Minnehaha Parkway to 56th Street West

Lyndale Avenue Bridge Reconstruction Project

An update will be provided on the new Lyndale Avenue Bridge over Minnehaha Creek. Hennepin Cty proposes to reconstruct the bridge, because of ongoing maintenance issues and the bridge's current sufficiency rating (35.2 out of a possible 100).

The reconstruction project includes the bridge itself, general traffic lanes, improved intersection controls, sidewalks, ornamental railings, and lighting. Additionally included are pedestrian and bicycle access paths between the bridge and Minnehaha Parkway, Minnehaha Creek embankment stabilization, and re-establishment of vegetation that will be impacted during construction.

Lyndale Bridge – West Elevation Looking East Alternative 1 (of 5) – June 15, 2010
