

Work Type Definition:

Environmental Documentation

Class I Actions; Class II Actions; Class III Actions

Definitions

I. Minimum Requirements

The work is to be under the direct supervision of a Minnesota Professional Engineer in the appropriate discipline

II. Description

Preparation of environmental documents begins once a project is in a recognized plan (Transportation Plan, Work Plan, State Transportation Improvement Plan, etc.), and Hennepin County decides to begin work on the environmental document. This work involves the study and evaluation of the social, environmental effects on the human and natural environment by transportation systems and alternate transportation modes in meeting identified transportation needs. Such work may involve the evaluation of alternate transportation corridors, and location/design alternatives within viable corridors. Additionally, the work entails the detailed study and preparation of environmental reports and documents that evaluate the physical, natural, social, cultural, economic, and human impacts of the alternatives under consideration upon the human and natural environment. Public involvement and interagency coordination are integral parts of the assessment process. Potential mitigations identified based on the studies and public involvement are evaluated and incorporated into the alternatives as appropriate.

This work type includes environmental documents that identify:

- A. Project purpose and need
- B. Alternatives considered
- C. Environmental and social impacts
- D. Mitigation of impacts
- E. Public involvement process
- F. Section 4(f) Evaluation, Section 6(f) Evaluation, Section 7 Report, etc.

Work Type Definition: Environmental Documentation

Environmental Documentation – Class I Actions:

(Environmental Impact Statement [EIS]): *The following are the minimum reports. Other special environmental studies in support of these reports may be required.*

- A. Scoping document/draft scoping decision document
- B. Scoping decision document
- C. Draft Environmental Impact Statement (DEIS)
- D. Final Environmental Impact Statement (FEIS)
- E. Record of Decision (ROD)
- F. Adequacy determination

Environmental Documentation – Class II Actions:

(Categorical Exclusions)

- A. Categorical exclusion determination document

Environmental Documentation – Class III Actions:

(Environmental Assessments [EA])

- A. Environmental Assessment (EA) or Environmental Assessment Worksheet (EAW)
- B. Findings of Facts and Conclusions
- C. Finding of No Significant Impact (FONSI)
- D. Negative Declaration (ND)

Work Type Definition:

Environmental Documentation

I. Standards and specifications

Standards and specifications required for a project under this work type may include the following:

Reports follow guidance at the following sources (*Note: The sources are guidance, but not regulatory. To be approved by Hennepin County, all environmental documents required by State or Federal Rule must be consistent with the applicable state and federal rules and regulations.*):

- A. *Highway Project Development Process (HPDP)*; Minnesota Department of Transportation.
- B. *Guidance for Preparing and Processing Environmental and Section 4(f) Documents*; TA 6640.8A, Federal Highway Administration.
- C. *Guide to Minnesota Environmental Rules*; Minnesota Environmental Quality Board.
- D. *EAW Guidelines – Preparing Environmental Assessment Worksheets*; Minnesota Environmental Quality Board.
- E. Federal and state laws, rules and regulations (and local regulations when required by state statute).
- F. At the Federal level, see 23 CFR 771.115.
- G. At the State of Minnesota level, See Minnesota Rules, Chapter 4410.
 - a. Environmental Impact Statement (EIS) must be prepared when thresholds at Minn. R. 4410.4400 are exceeded. Environmental Assessment (EA) and Environmental Assessment Worksheet (EAW) are frequently prepared when no specific threshold is exceeded.
 - b. EAW (likely an EA) must be prepared when the threshold of Minn. R. 4410.4300 are exceeded.
 - c. Categorical Exclusion Determination documents are prepared when the above noted thresholds are not exceeded, following guidance in *Project Report Decision Tree for “Smaller” MnDOT Projects*. *Report Decision Tree for “Larger” MnDOT Projects* provides additional guidance on determining which environmental document is appropriate relative to the proposed Hennepin County project.

Work Type Definition:
Environmental Documentation

II. Provided by Hennepin County

Hennepin County will furnish data or material in its possession relating to the project that may be of use to the consultant in performing the work associated with the work type which may include the following:

- A. Electronic survey files.
- B. Wetland delineations.
- C. Field exploration, investigation and preliminary materials recommendations.
- D. Public meeting notes and/or Public hearing transcripts.
- E. Environmental evaluations performed.
- F. Preliminary and proposed project details to the extent that they have been developed.

Work Type Definition: Environmental Documentation

III. **Provided by Consultant:** Deliverables to be supplied by the consultant for a project may include the following:

Levels of Deliverables (Compare and Contrast)		
Class I Actions (EIS) (1.11)	Class II Actions (Categorical Exclusions) (1.12)	Class III Actions (EA) (1.13)
<p>A. Projects with significant impacts or the potential for significant effects.</p> <p>B. Many studies required* (e.g., traffic, wetland, noise, air, water quality, drainage, relocation, economic, community impacts, wildlife, etc.).</p> <p>C. Requires preparation of several reports, as noted above.</p> <p>D. Class I Actions also require a certain level of public involvement including public meetings and hearings.</p> <p>* Note: Refer to separate work type definitions and Statements of Minimum Technical Qualification for the various subject study areas for which separate pre-qualification is required (i.e., noise analysis, air quality analysis, wetland services, traffic studies, etc.). <i>If a Work Type 1.11 Consultant is not prequalified in one or more of these subject areas, the Work Type 1.11 Consultant will need to sub-contract work in the subject area to a pre-qualified sub-consultant. Sub-consultants can be identified by Work Type 1.11</i></p>	<p>A. Projects that fairly clearly do not have the potential for significant effects. The purpose of the report is to provide evidence on that point, and to obtain environmental approval as required from state and federal agencies.</p> <p>B. Several studies* possible (e.g., traffic, wetland, noise, air, water quality, drainage, etc.).</p> <p>C. Requires preparation of one report (Categorical Exclusion Determination).</p> <p>* Note: Refer to separate work type definitions and Statements of Minimum Technical Qualification for the various subject study areas for which separate pre-qualification is required (i.e., noise analysis, air quality analysis, wetland services, traffic studies, etc.). <i>If a Work Type 1.12 Consultant is not prequalified in one or more of these subject areas, the Work Type 1.12 Consultant will need to sub-contract work in the subject area to a pre-qualified sub-consultant. Sub-consultants can be identified by Work Type 1.12</i></p>	<p>A. Projects with potential, or that may have the potential, for significant impacts.</p> <p>B. Several studies* likely (e.g., traffic, wetland, noise, air, water quality, drainage, relocation, economic, community impacts, wildlife, etc.).</p> <p>C. Requires preparation of two reports (EA or EAW, and Findings of Facts and Conclusions).</p> <p>* Note: Refer to separate work type definitions and Statements of Minimum Technical Qualification for the various subject study areas for which separate pre-qualification is required (i.e., noise analysis, air quality analysis, wetland services, traffic studies, etc.). <i>If a Work Type 1.13 Consultant is not prequalified in one or more of these subject areas, the Work Type 1.13 Consultant will need to sub-contract work in the subject area to a pre-qualified sub-consultant. Sub-consultants can be identified by Work Type 1.13</i></p>
