

Work Type Definition: Solid Waste and Recycling Services

I. Description

The county is charged with managing solid waste by state law. The consultant will assist with tasks including assessing and evaluating options for managing solid waste; current and future management facilities; composition and quantification of various parts of the waste stream; recovery rate studies; market and financial analysis. The consultant may contribute to strategic planning activities intended to address long term needs of the county, including the evaluation of policies that affect the ability of the county to meet its waste management goals and other relevant activities and policies.

II. Provided by consultant

Deliverables to be supplied by the consultant for a project may include the following:

- Assessments and evaluations of the solid waste stream
- Waste, recycling and/or organics facility analysis and design
- Waste and recycling composition and quantification studies
- Recovery rate studies
- Landfill diversion analysis
- Market analysis
- Financial evaluation and modeling
- Policy evaluations and reports
- Strategic planning recommendations
- Best management practices research and evaluation
