

# HENNEPIN COUNTY ELECTIONS

## New accessible voting technology

Hennepin County polling places will feature new assistive voting technology this year. The OmniBallot Tablet is a ballot marking device for voters with disabilities, allowing voters to mark their ballots independently and privately without using a pen.

### Accessible

- Provides ballot magnification or high-contrast background for voters with visual impairment
- Offers audio reading of the ballot through headphones
- Allows voters three options to mark choices:
  - Touchscreen
  - Braille keypad
  - 3-button device

### Easy to use

- Uses the same ballot as everyone else
- A printer fills the ovals on the ballot
- Ballot goes in the same tabulator to be counted as all other ballots
- An election judge will be available at polling places to answer questions
