HOW TO MIX BLEACH SOLUTIONS

| BLEACH SOLUTION 1 <br> (Disinfectant, $\sim 800-850 \mathrm{ppm}$ ) Use for hard surfaces |  | BLEACH SOLUTION 2 <br> (Sanitizer, $\sim 100 \mathrm{ppm}$ ) Use for mouthed toys and food contact surfaces |  |
| :---: | :---: | :---: | :---: |
| Water | 8.0-8.25\% Bleach | Water | 8.0-8.25\% Bleach |
| 1 gallon (16 cups) | 2.5 tablespoons (TBS) | 1 gallon (128 ounces) | 1 teaspoon (tsp) |
| 1 quart <br> (4 cups) | 2 teaspoons (tsp) | 1 quart (32 ounces) | $\begin{aligned} & 1 / 4 \text { teaspoon } \\ & (\mathrm{tsp}) \end{aligned}$ |
| $\begin{aligned} & 1 \text { pint } \\ & (2 \text { cups }) \end{aligned}$ | 1 teaspoon (tsp) | 1 pint (16 ounces) | $\begin{aligned} & 1 / 8 \text { teaspoon } \\ & \text { (tsp) } \end{aligned}$ |

[^0]NOTE: If you have a private septic system, call your local environmental health agency to determine the impact of putting bleach solutions into the septic system on a daily basis (it is generally not advised).

[^0]:    * Make solutions fresh daily, label with date and contents.
    * Mix the bleach solution in an airtight, cloudy plastic container.
    * Test bleach solution 2 daily using a test kit.
    * Date bottle of bleach when purchased; do not keep longer than 3 months.
    * Date bottle of bleach when opened; do not keep longer than 30 days.
    * Always follow the manufacturer's instructions exactly for handling.
    * Store bleach safely out of reach of children.
    * Never mix bleach with any other household product.
