**Acknowledgments** .......................................................... I-1

**Table of Contents** ......................................................... II-1 to II-9
  Content: ........................................................................ II-1 to II-4
  List of Figures: .......................................................... II-5 to II-9

**Executive Summary** ......................................................... III-1 to III-7
  Background ................................................................. III-1
  Existing Corridor Conditions ........................................ III-3
  Corridor Vision ............................................................. III-4
  Station Area Typologies ................................................ III-5
  Best Practices ............................................................ III-5
  Community Engagement Plan .......................................... III-6
  Recommendations ......................................................... III-6

**Chapter 1: Introduction** ................................................... 1-1 to 1-9
  Introduction ................................................................. 1-1
  Purpose of the Pre-Planning Study ................................... 1-3
  Relationship to the Transit Planning Process ................. 1-5
  Relationship to Regional Plans .................................... 1-6
  Corridors of Opportunity ............................................. 1-7
  Previous Corridor Studies .......................................... 1-8
  Previous Small Area Studies ........................................ 1-9

**Chapter 2: Transit Oriented Development (TOD) Background** .... 2-1 to 2-6
  Introduction ................................................................. 2-1
  Basic Principles .......................................................... 2-1
  TOD vs. TAD ............................................................... 2-5
  Why TOD? ................................................................. 2-6
Chapter 3: Existing Corridor Conditions ............................................. 3-1 to 3-14
  Introduction .................................................................................. 3-1
  Transitway Comparisons .............................................................. 3-1
  Transportation ............................................................................. 3-5
  Land Use .......................................................... 3-6
  Employment ................................................................................. 3-7
  Property Valuation ....................................................................... 3-8
  Residential Valuation ................................................................. 3-9
  Non-Residential Valuation ............................................................ 3-10
  Housing ....................................................................................... 3-11
  Housing Prices ............................................................................. 3-12
  Senior Housing ............................................................................ 3-13
  Construction Trends .................................................. 3-14

Chapter 4: Corridor Vision ................................................................. 4-1 to 4-2
  Introduction .................................................................................. 4-1
  Visioning Process ................................................................. 4-2

Chapter 5: Bottineau Corridor Station Area Typologies .................. 5-1 to 5-13
  Introduction .................................................................................. 5-1
  Typology Matrix ......................................................................... 5-2
  Station Connectivity .................................................................... 5-2
  Land Use Characteristics ............................................................. 5-4
  Potential for Change .................................................................... 5-6
  Equity Indicators ......................................................................... 5-8
  Place Types ................................................................................. 5-10

Chapter 6: Planning Best Practices for the Bottineau Corridor .......... 6-1 to 6-21
  Introduction .................................................................................. 6-1
  Planning for TOD at the Corridor Scale ....................................... 6-2
  Bottineau Corridor Best Practices ............................................. 6-7
  Addressing Major Barriers for Pedestrians and Bikers ............... 6-13
  Using Shuttles/Circulators to Support Station Access/Last Mile Connections 6-18
  Other Best Practice Resources ................................................. 6-21
### Chapter 7: Community Engagement Plan 7-1 to 7-28
- Introduction 7-1
- Background and Methodology 7-2
- Inventory of Current Bottineau Corridor Community Engagement Activities 7-3
- Identification of Underrepresented Populations Along the Bottineau Corridor 7-10
- Recommendations for Enhancing Engagement of Underrepresented Populations 7-16

### Chapter 8: Recommendations 8-1 to 8-23
- Introduction 8-1
- 1. Vision and Concepts 8-1
- 2. Policy Changes 8-4
- 3. Implementation Strategies 8-4
- Financial Strategies 8-16

### Appendix A1: Station Area Conditions Analysis A1-1 to A1-70
- Introduction A1-1
- Oak Grove Parkway Station - Land Use A1-3
- Oak Grove Parkway Station - Valuation A1-4
