## PUBLIC HEALTH

---

### The Ryan White system of care: HIV-related services and healthcare providers

The Ryan White Program at Hennepin County provides funding for HIV-related services and healthcare targeting low-income residents living with HIV across the 13-county metropolitan area, centered on Hennepin County. HIV care services allow people living with the virus to lead healthy, vibrant lives. These services also stop the virus from spreading.

HIV testing is an important tool to prevent new infections. Today's test results are available in five minutes. For little or no cost, residents can access HIV testing through primary care providers, community-based settings, private insurance, Medical Assistance, Medicare, and other public health insurance plans.
