## Office of Strategy, Planning, and Evaluation

### Out-of-Home Placement & Screening Trends: Q4 2019

#### About this Report

The Department of Community Corrections and Rehabilitation (DOCCR) has been tracking out-of-home placements (OHP) for juvenile offenders since 2009. This report describes youth who were in out-of-home placement during the 4th quarter of 2019. Data is pulled from the juvenile case management information system (MAIn) using the OHP Population Report.

This report provides trend data on youth with placements that closed during the quarter, as well as those with placements that were open on the last day of the quarter (December 31, 2019). Placements are organized by location (Hennepin County, Greater Minnesota, or out of state), and by type (residential treatment centers, sexual health treatment centers, the County Home School, foster homes, shelters, transition centers, group homes, chemical dependency centers, mental health centers, and evaluations). This report also organizes placements by race and gender.

DOCCR has been tracking information about the screening process for out-of-home placements since 2013. This report provides data on placement screenings by type, location, reason, race, and parental involvement. This report also provides a way to monitor recent policy changes. These policy changes include: (1) limiting the overall use of screening and OHP, but making every attempt to keep the youth in Hennepin County when OHP is recommended; (2) observing all aspects of screening and OHP decision points by race and gender in an effort to reduce disparity; (3) keeping RTC stays to under 180 days (6 months); (4) eliminating the use of OHP screening as a consequence/response for technical violations; (5) ensuring screening is matching youth to the least restrictive services that meet their needs; and (6) allowing parents to have a voice in the process.

#### Highlights/Key Trends:

- Screenings
  - The number of placement screenings has continued to trend downward
  - More than half of the screenings were done for a new charge
  - Almost  $\frac{3}{4}$  of youth screened identified as Black/African American; 60% of the overall Juvenile Probation population identifies as Black/African American
  - In Q4 2019, parents attended less than half of the screenings; this is similar to Q2 2019

January 2020

**Courtney Hougham**

Principal Planning Analyst

**Danette Buskovic**

Supervisor

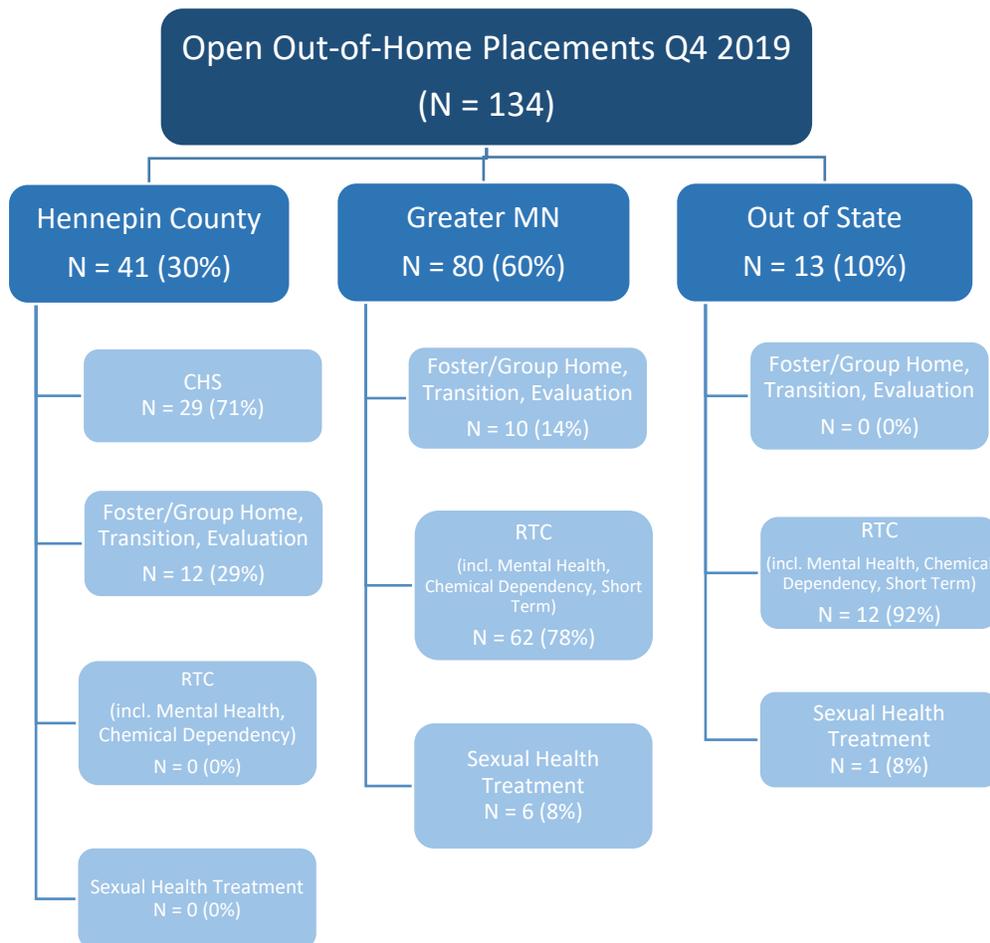

- Placements
  - Youth whose CHS-RTC or other RTC placement ended in Q4 2019, spent a median of 176 days in placement; this is just under the 180-day benchmark set by the department
  - Sixty percent of youth with an open placement during Q4 2019 were placed outside of Hennepin County
  - Youth of color are the majority of youth in placement be it RTC or otherwise

## Total Out-of-Home Placements

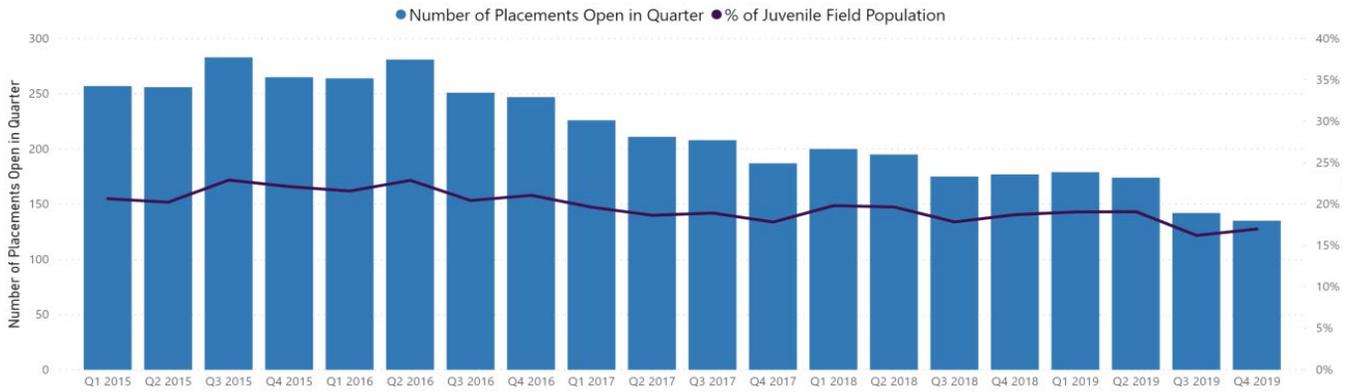

Figure 1<sup>1</sup> shows the breakout of Hennepin County clients in out-of-home placements. Overall, there were 134 out-of-home placements in quarter 4 of 2019. Thirty percent were placements within Hennepin County, 60% were placements in Greater Minnesota, and 10% were out of state placements.

**Figure 1. Total Out-of-Home Placements Q4 2019**

<sup>1</sup> Numbers in the chart may not equal the N identified at the top due to a small number of placements that do not fit the categories shown here, primarily shelters.

**Figure 2. Percent of Juvenile Probation Population (excluding STS) Open in OHP by Quarter**

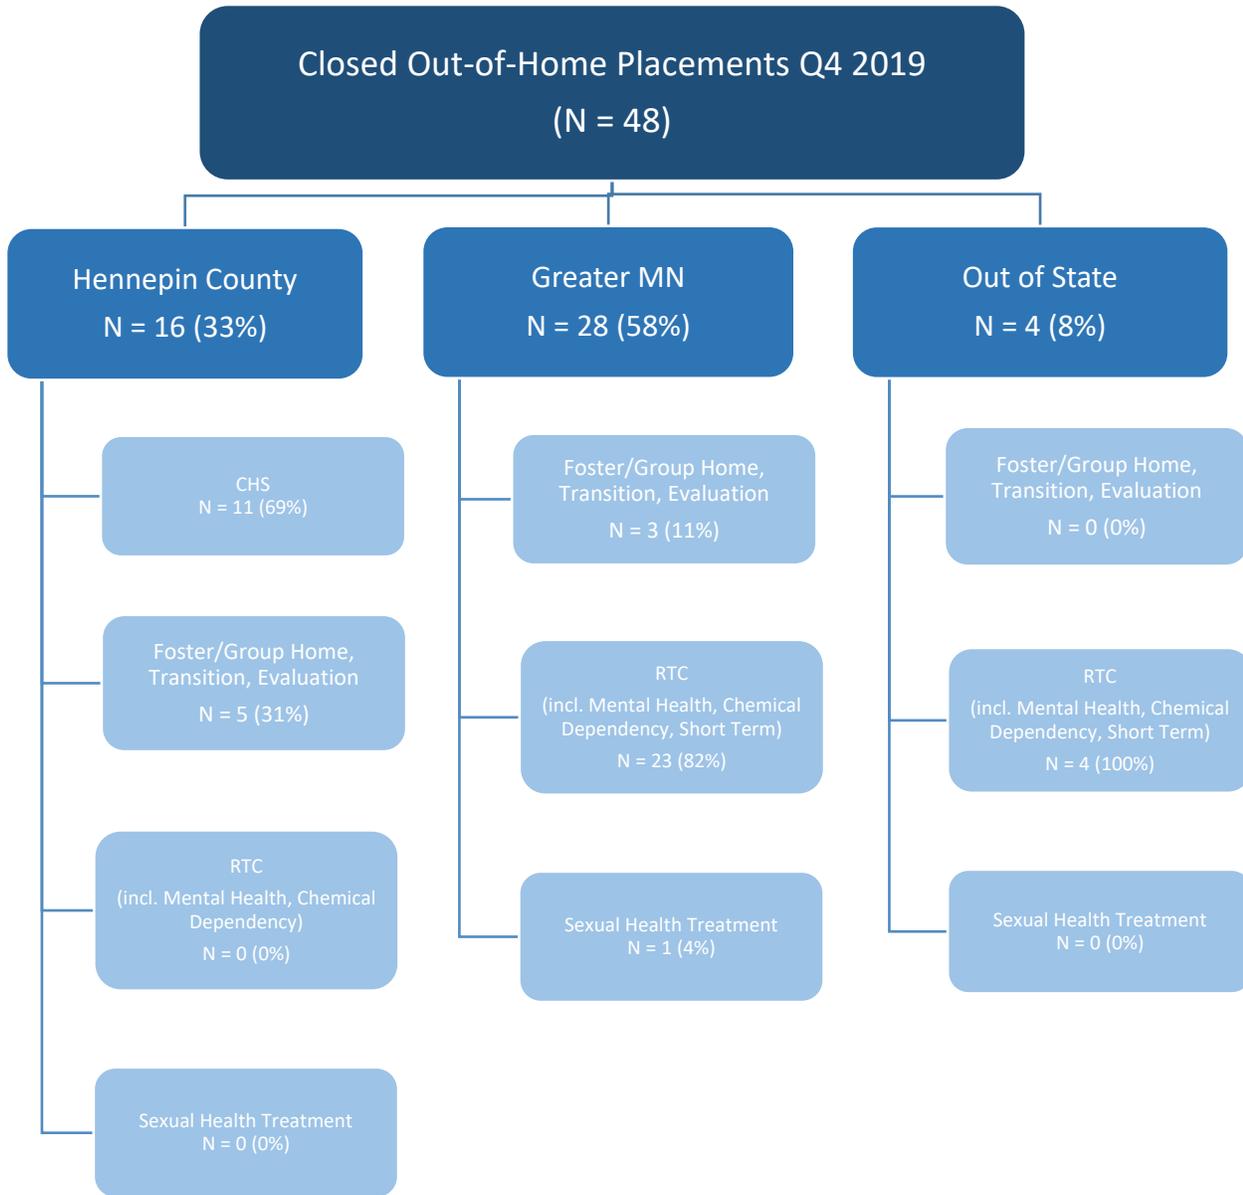

## Closed Placements

Figure 3<sup>2</sup> shows the breakout of closed out-of-home placements (those which ended in the quarter). Of the 134 total placements, 48 closed during Q4 2019.

Thirty-three percent of the placements that closed were placements in Hennepin County, 58% were Greater Minnesota placements and 8% were out of state placements.

<sup>2</sup> Numbers in the chart may not equal the N identified at the top due to a small number of placements that do not fit the categories shown here, primarily shelters.

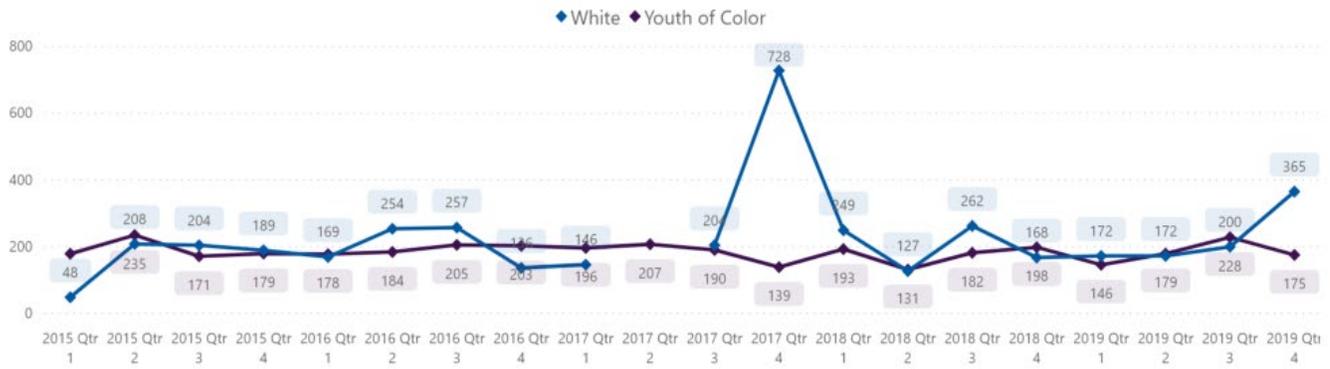

**Figure 3. Closed Out-of-Home Placements Q4 2019**

The median number of days in placement for youth with CHS-RTC placements and other RTC placements that closed during quarter 4 of 2019 is shown below. The median number of days in placement for youth of color (n = 36) was 175 days. The median length of stay for white youth (n = 1) was 365 days. Two youth of color closed on Sexual Health Treatment in Q4 2019 and the median time in placement was 497 days. Six youth of color closed from foster or group homes with a median of 29 days in placement. Three youth of color closed in a transition or evaluation with a median of 92 days in placement.

Figures 4 and 5 show the median number of days in placement for CHS-RTC placements and other RTC placements that closed in that quarter. Figure 6 shows the median days in placement for all other types.

**Figure 4. Median number of days in placement for CHS-RTC<sup>3</sup> or other RTC placement for closed placements by race**

**Figure 5. Median number of days in placement for CHS-RTC<sup>4</sup> or other RTC<sup>5</sup> placement for closed placements by race**

## Open Placements

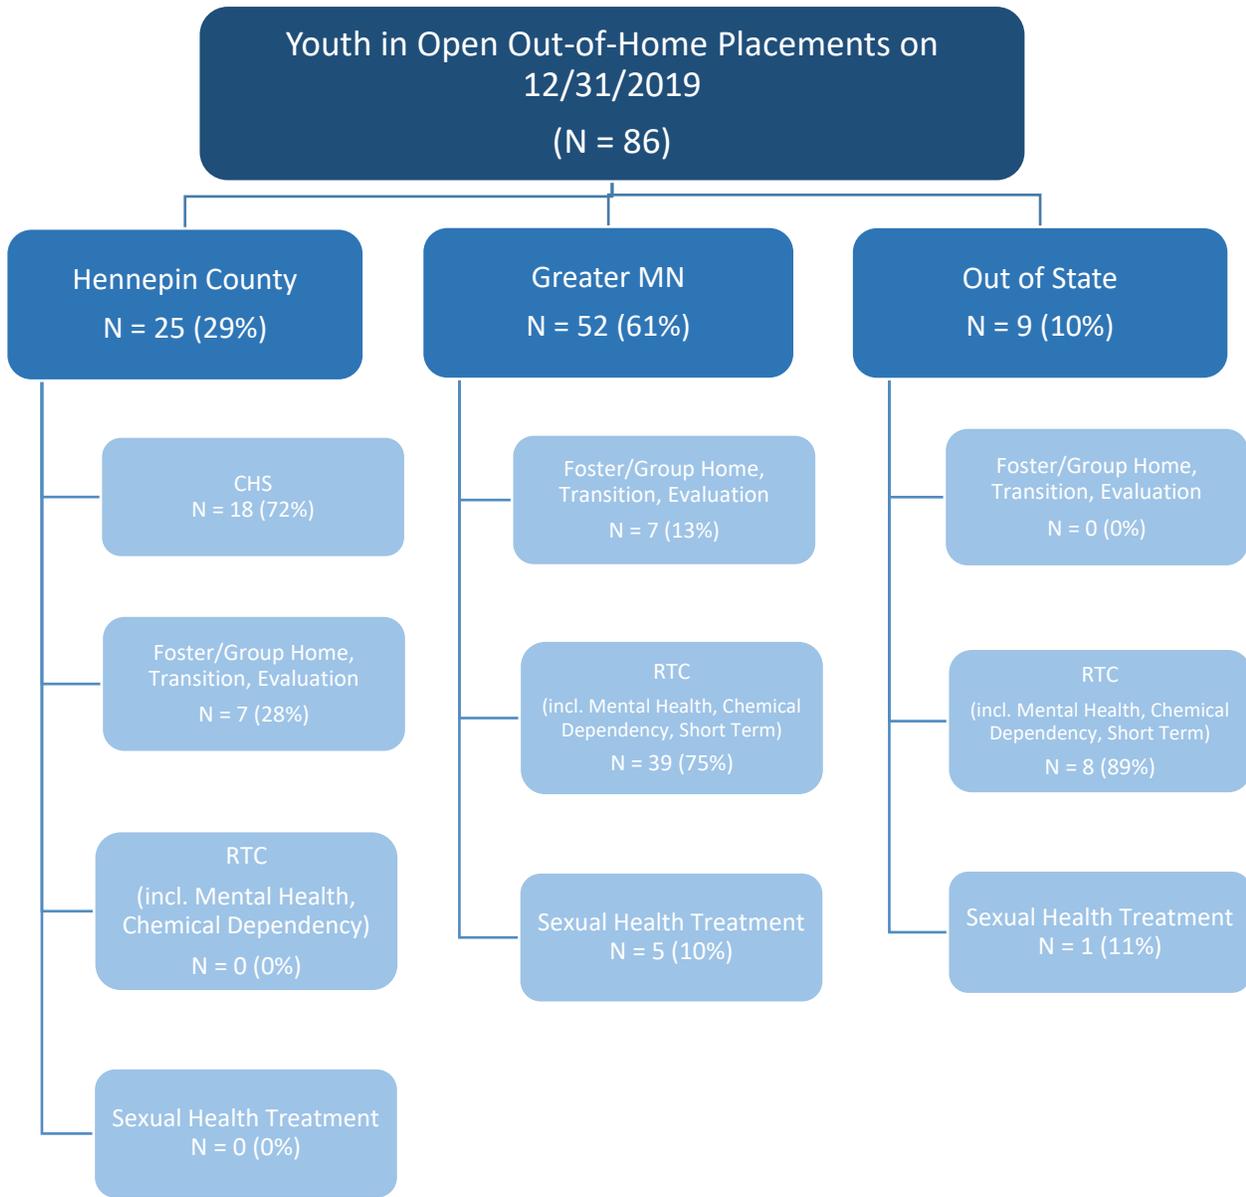

There were 86 youth in an out-of-home placement on the last day of the quarter (December 31, 2019).

Twenty nine percent of open placements were in Hennepin County, 61% were in Greater Minnesota, and 10% were out of state (see Figure 7)<sup>7</sup>.

<sup>6</sup> Ns are too small to be broken out by race. Does not include shelters.

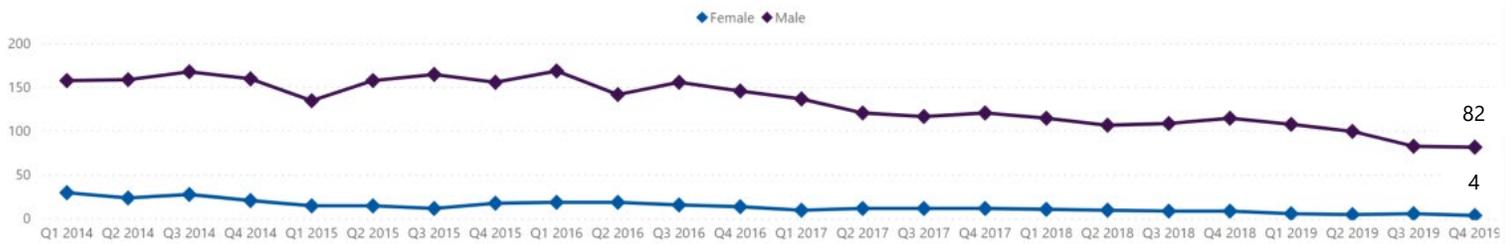

<sup>7</sup> Numbers in the chart may not equal the N identified at the top due to a small number of placements that do not fit the categories shown here, primarily shelters.

**Figure 7. Open Out-of-Home Placements Q4 2019**

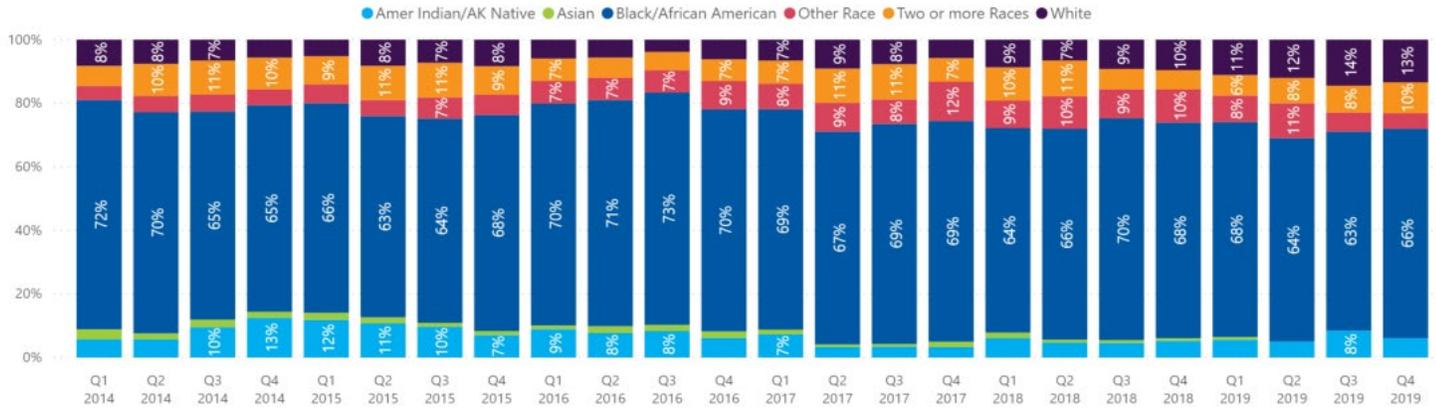

The charts below show the number of male and female youth in out-of-home placement on the last day of the quarter (December 31, 2019).

**Figure 8. Open placements by gender on December 31, 2019**

**Figure 9. Boys in open placements by race on December 31, 2019**

**Figure 10. Girls in open placements by race on December 31, 2019**

## Hennepin County Placements

The table below details the number of youth open on the last day of the quarter (December 31, 2019) for each placement location in Hennepin County broken out by placement type and by gender and race. Note in Figure 11 that there were no female juveniles open in Out of Home Placement in Hennepin County on December 31, 2019.

**Figure 11. Open placements in Hennepin County**

## Placement Screening

Youth receive a placement screening to determine if an out-of-home placement is recommended<sup>8</sup>. The chart below shows the number of placement screenings conducted on youth by quarter. There was a 73% decrease in initial screenings between Q2 2014 and Q4 2019. After six months, placements may be re-screened for a 90-day extension. Screenings marked as “done deal” are included in Figure 14 for the overall trend but excluded from Figures 15 – 17.

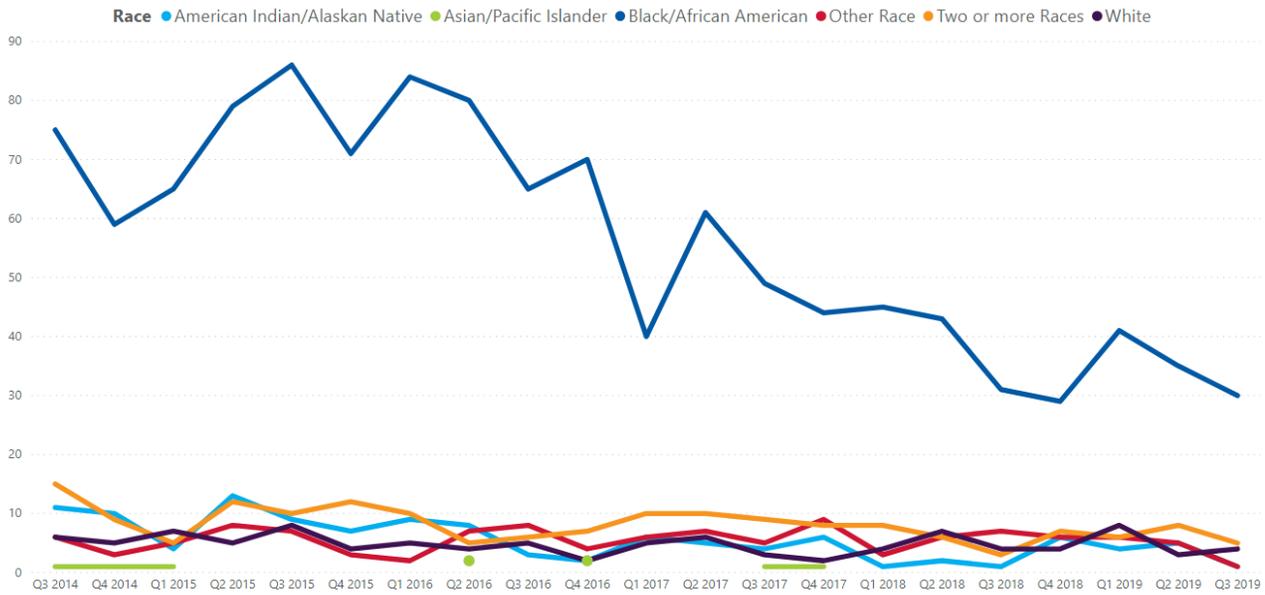

**Figure 14. Number of placement screenings by type of screening**

<sup>8</sup> At times a youth may be screened for more than one placement on a single day. These records have been counted as duplicates and have been removed for analysis. Youth who are sent directly to placement as a court order have also been removed for analysis, though the trend appears in Figure 14.

Figure 15 shows the total number of screenings above broken out by race excluding screenings sent directly to placement by the courts. These are all screenings referred by Probation Officer.

**Figure 15. Placement screenings by race**

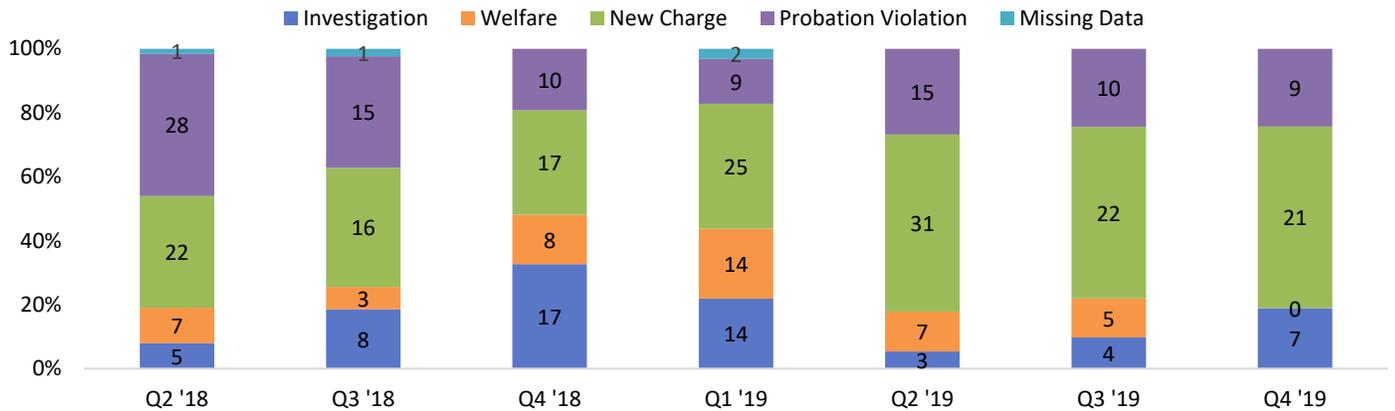

Placement screenings are conducted for several different reasons<sup>9</sup>. In Q4 2019, 21 screenings (57%) were conducted for a new charge, 7 (19%) were for an investigation, and 9 (24%) because of a probation violation<sup>10</sup>. Of the 8 unique clients screened for a probation violation, 6 had failed placement probation violation screenings and 2 had technical violation/failed community services screenings. One client was screened twice since he was not accepted by the recommended placement and he was re-screened on the same violation.

<sup>9</sup> Staff began recording the reason for conducting placement screenings in Q2 2017, though it was infrequently recorded until Q2 2018. **Investigation:** Client is pending an Investigation event and is not already on probation; **Welfare:** Client’s placement is needs-based (housing need, closure of past placement, etc.); **New Charge:** Client has a new pending offense; **Probation Violation:** Client is being screened due to probation violations other than a new offense.

<sup>10</sup> One client was screened twice.

**Figure 16. Reason for placement screening**

The following chart and table show the breakdown of placement screenings by race. Of the 41 screenings, 30 (73%) were youth who identified as Black/African American.

**Figure 17. Placement admissions after screening by type and race**

Staff began recording parental attendance at placement screenings in Q2 2018. To increase parent participation, parents were given the opportunity to attend via phone, beginning in Q4 2018. In Q4 2019 parents attended 46% (N=17) of placement screenings.

**Figure 18. Parental attendance at placement screening**
