Office of Strategy, Planning, and Evaluation

Out-of-Home Placement & Screening Trends: Q3 2020

About this Report

The Department of Community Corrections and Rehabilitation (DOCCR) has been tracking out-of-home placements (OHP) for juvenile offenders since 2009. This report describes youth who were in out-of-home placement during the 3rd quarter of 2020. Data is pulled from the juvenile case management information system (MAIn) using the OHP Population Report.

This report provides trend data on youth with placements that closed during the quarter, as well as those with placements that were open on the last day of the quarter (September 30, 2020). Placements are organized by location (Hennepin County, Greater Minnesota, or out of state), and by type (residential treatment centers, sexual health treatment centers, the County Home School, foster homes, shelters, transition centers, group homes, chemical dependency centers, mental health centers, and evaluations). This report also organizes placements by race and gender.

This report provides data on placement screenings by type, location, reason, race, and parental involvement. This report also provides a way to monitor recent policy changes. These policy changes include: (1) limiting the overall use of screening and OHP, but making every attempt to keep the youth in Hennepin County when OHP is recommended; (2) observing all aspects of screening and OHP decision points by race and gender in an effort to reduce disparity; (3) keeping RTC stays to under 180 days (6 months); (4) eliminating the use of OHP screening as a consequence/response for technical violations; (5) ensuring screening is matching youth to the least restrictive services that meet their needs; and (6) allowing parents to have a voice in the process.

Highlights/Key Trends:

- Screenings
 - The total number of placement screenings dropped slightly from the previous quarter
 - 47% of screenings were done for a new charge
 - Screenings due to a probation violation continued to be at a lower rate than previous quarters
 - In Q3 2020, parental attendance at screenings decreased to 44% after a record high percentage in Q2 2020.

November 2020

Courtney Hougham

Principal Planning Analyst

Danette Buskovic

Supervisor

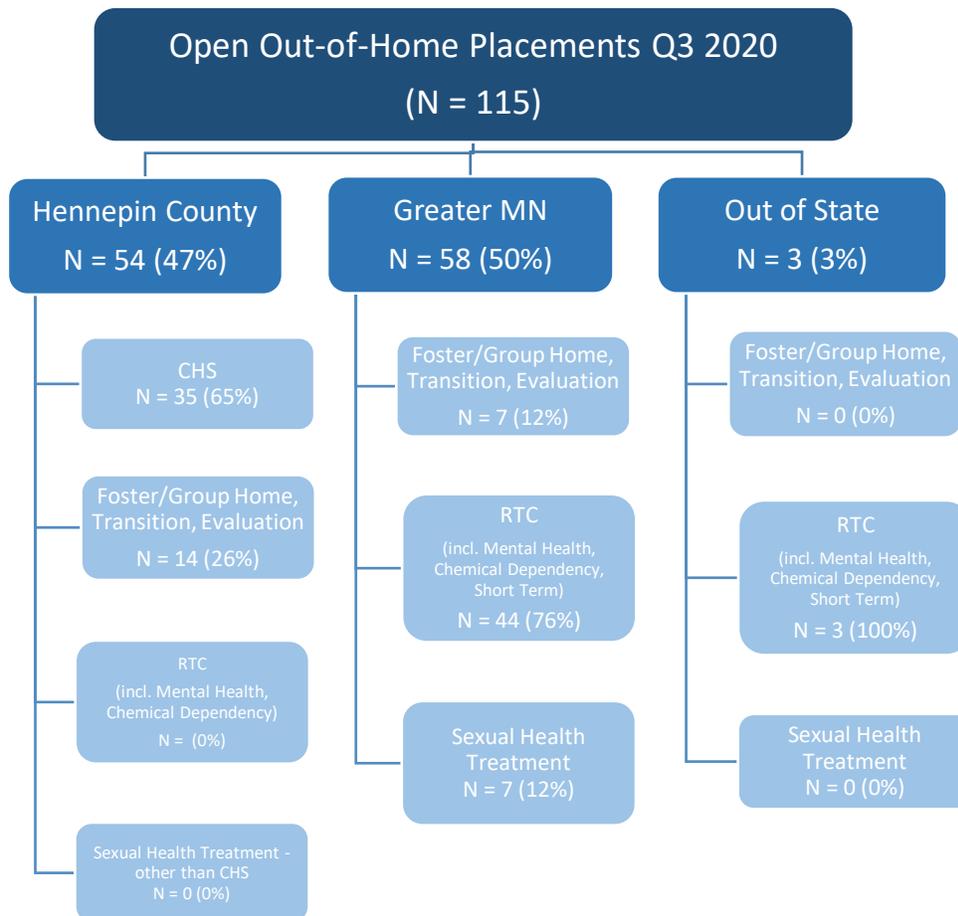

- Placements
 - Youth whose CHS-RTC or other RTC placement ended in Q3 2020, spent a median of 148 days in placement; this is a 26 day decrease in length of stay compared to Q2 2020
 - At the end of Q3 2020, three youth (5%) out of 66 remained in an OHP out-of-state; 42% were in placements within Hennepin – a slight decrease from previous quarters
 - Youth of color continue to be the majority of youth in placement be it RTC or otherwise

Total Out-of-Home Placements

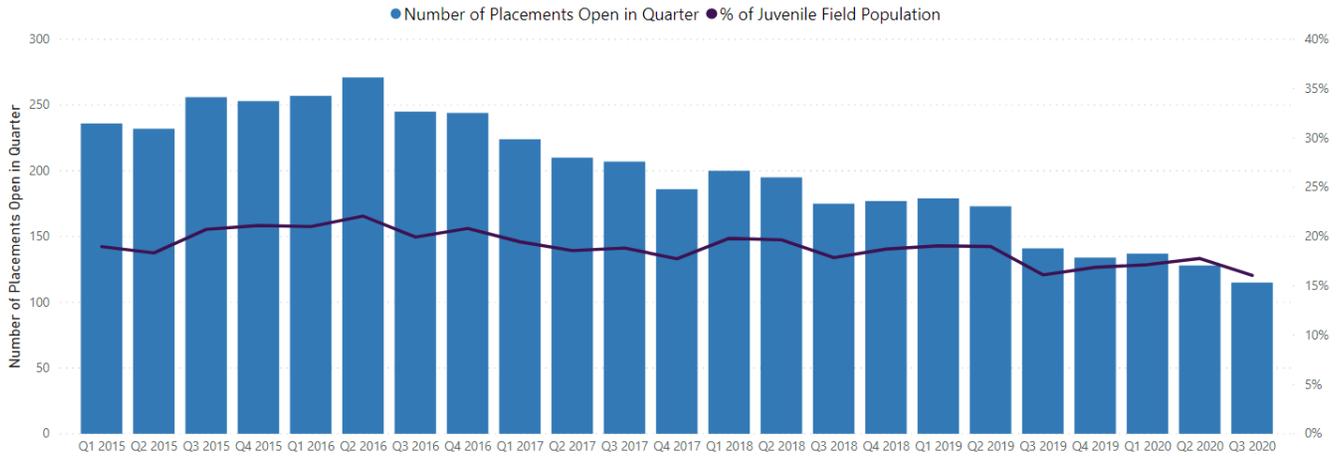

Figure 1¹ shows the breakout of Hennepin County clients in out-of-home placements. Overall, there were 115 out-of-home placements in Quarter 3 of 2020. Forty-seven percent were placements within Hennepin County, 50% were placements in Greater Minnesota, and 3% were out of state placements. County Home School numbers are a combination of RTC and Sexual Health Treatment Programs.

Figure 1. Total Out-of-Home Placements Q3 2020

¹ Numbers in the chart may not equal the N identified at the top due to a small number of placements that do not fit the categories shown here, primarily shelters.

Figure 2. Percent of Juvenile Probation Population (excluding STS) Open in OHP by Quarter

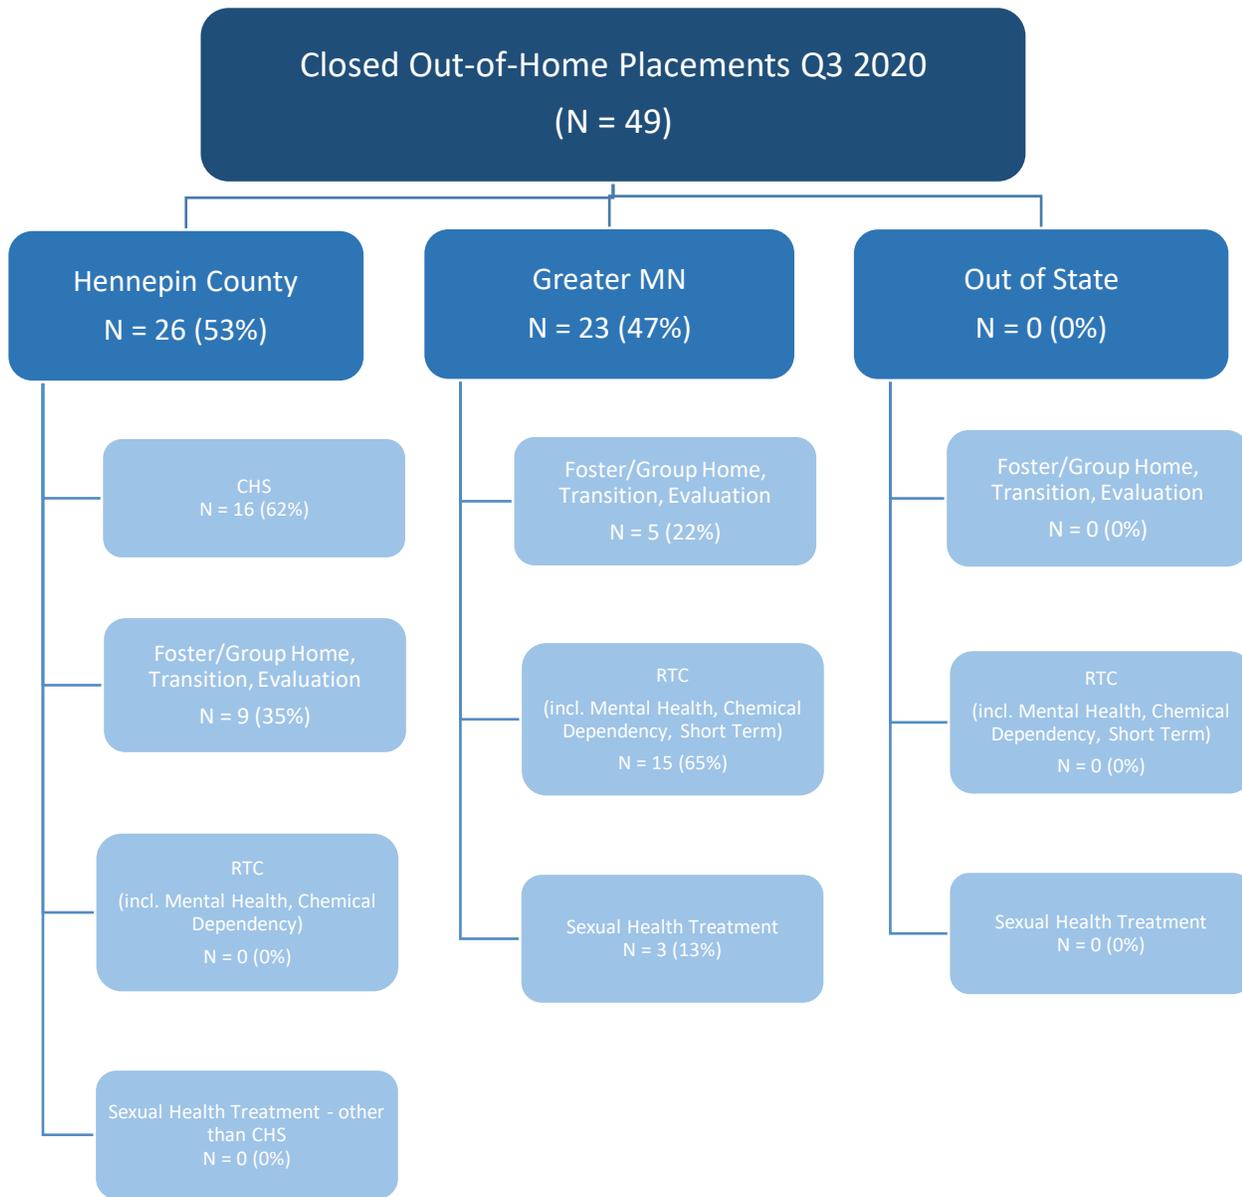

Closed Placements

Figure 3² shows the breakout of closed out-of-home placements (those which ended in the quarter). Of the 115 total placements, 49 closed during Q3 2020.

Fifty-three percent of the placements that closed were placements in Hennepin County, 47% were Greater Minnesota placements and 0% were out of state placements.

² Numbers in the chart may not equal the N identified at the top due to a small number of placements that do not fit the categories shown here, primarily shelters.

Figure 3. Closed Out-of-Home Placements Q3 2020

The median number of days in placement for youth with CHS-RTC placements and other RTC placements that closed during Quarter 3 of 2020 is shown below. The median number of days in placement for youth of color (n = 27) was 146 days. The median length of stay for white youth (n = 1) was 426 days. Three youth of color closed on Sexual Health Treatment in Q3 2020 and the median time in placement was 477 days; three White youth closed on Sexual Health Treatment in Q3 2020 and the median time in placement was 481 days. Twelve youth of color closed from foster or group homes with a median of 81 days in placement; two White youth closed from foster or group homes with a median of 47 days in placement.

Figures 4 and 5 show the median number of days in placement for CHS-RTC placements and other RTC placements that closed in that quarter. Figure 6 shows the median days in placement for all other types of placement that closed in Q3 2020.

Figure 4. Median number of days in placement for CHS-RTC³ or other RTC placement for closed placements by race

Open Placements

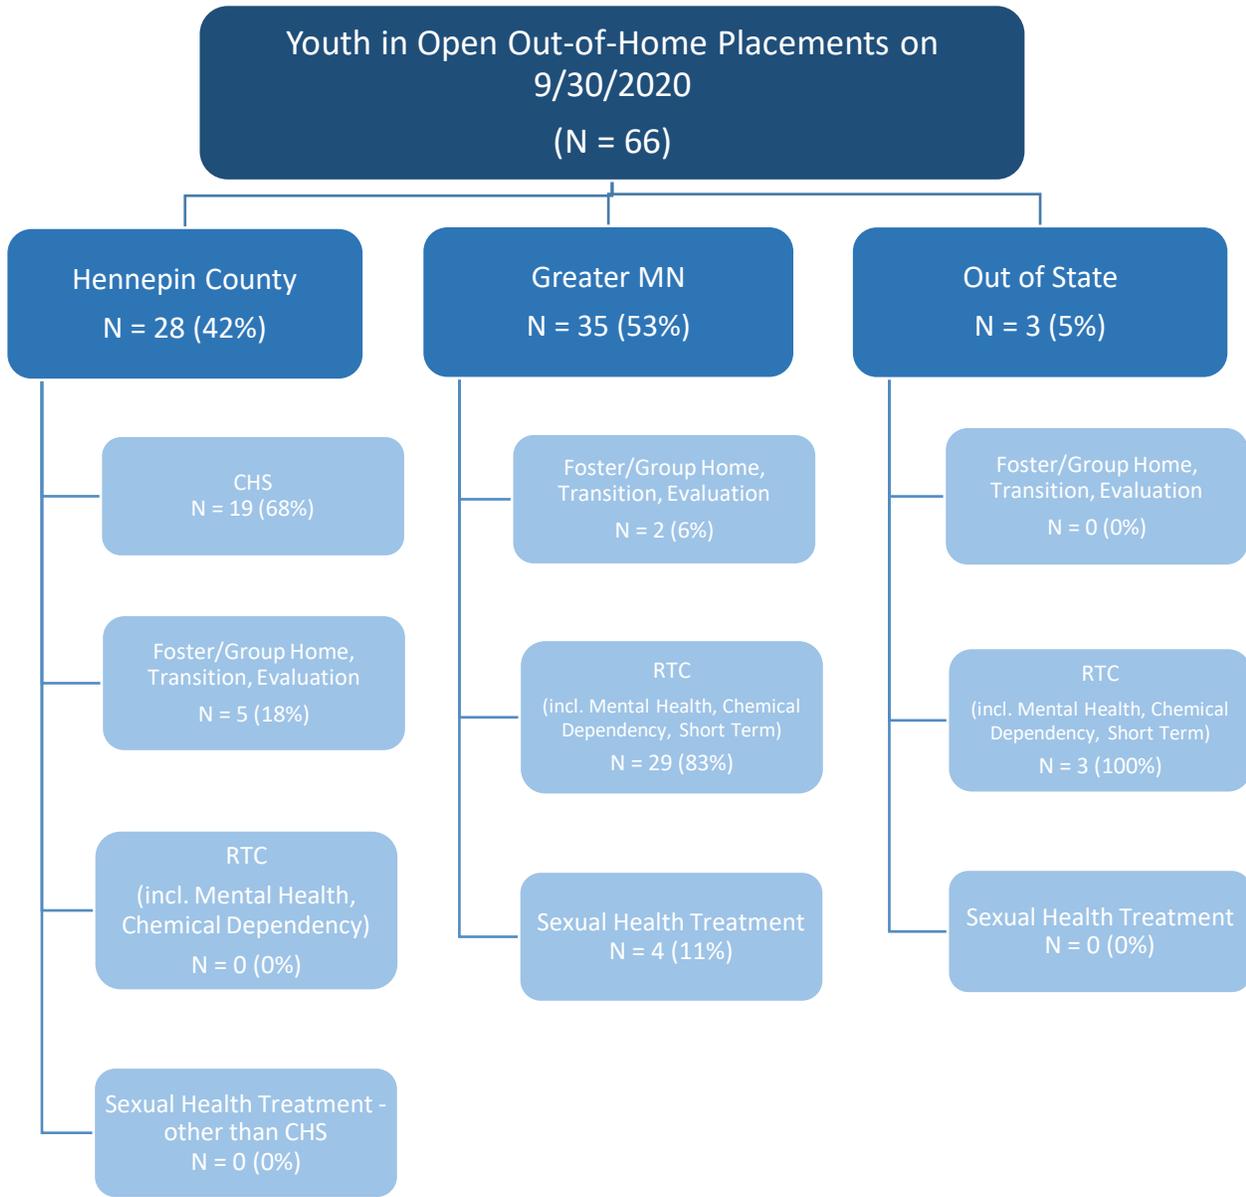

There were 66 youth in an out-of-home placement on the last day of the quarter (September 30, 2020).

Forty-two percent of open placements were in Hennepin County, 53% were in Greater Minnesota, and 5% were out of state (see Figure 7)⁷.

⁶ Ns are too small to be broken out by race. Does not include shelters.

⁷ Numbers in the chart may not equal the N identified at the top due to a small number of placements that do not fit the categories shown here, primarily shelters.

Figure 7. Open Out-of-Home Placements Q3 2020

The charts below show the number of male and female youth in out-of-home placement on the last day of the quarter (September 30, 2020).

Placement Screening

Youth receive a placement screening to determine if an out-of-home placement is recommended⁸. The chart below shows the number of placement screenings conducted on youth by quarter. There was a 77% decrease in initial screenings between Q3 2015 and Q3 2020. After six months, placements may be re-screened for a 90-day extension. Screenings marked as “done deal” are included in Figure 14 for the overall trend but excluded from Figures 15 – 17.

Figure 14. Number of placement screenings by type of screening

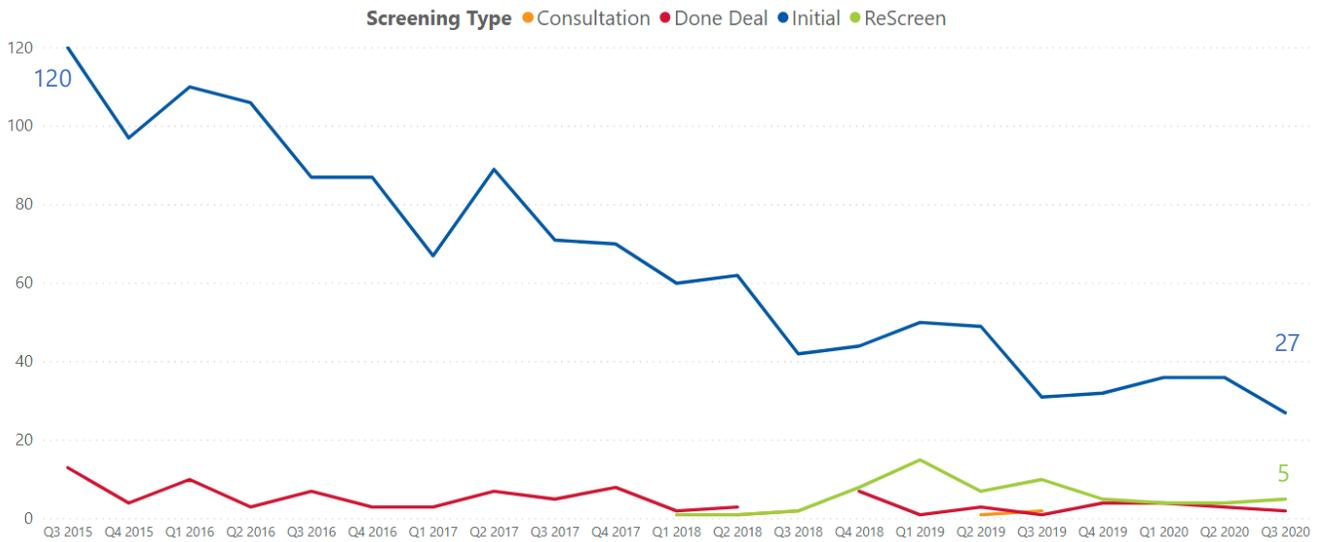

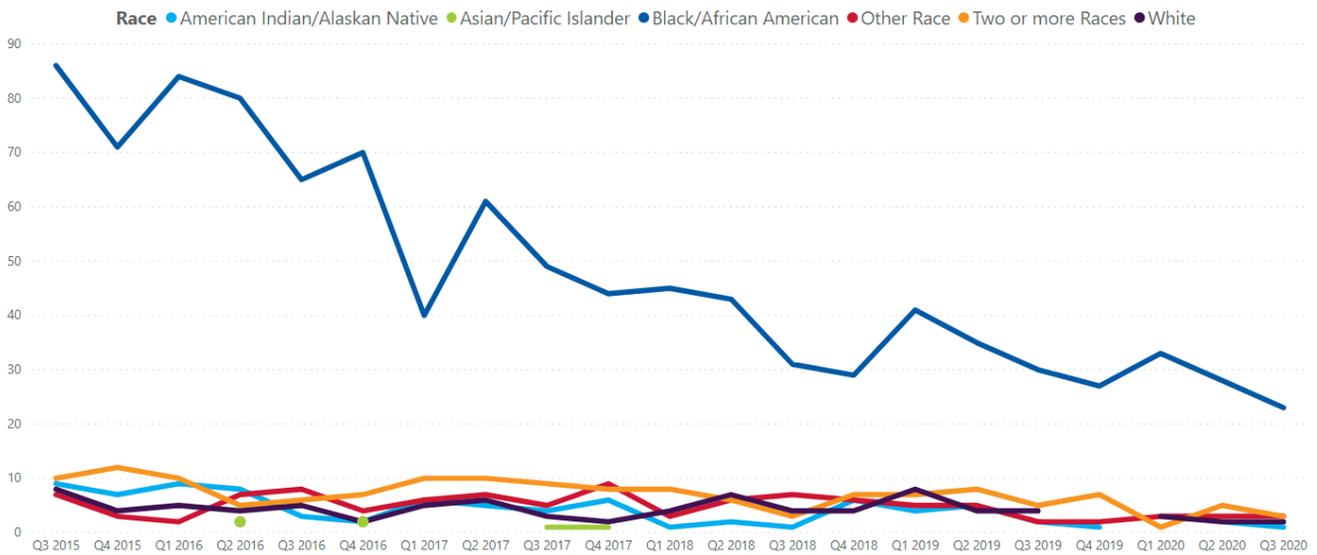

Figure 15 shows the total number of screenings above broken out by race excluding screenings sent directly to placement by the courts. These are all screenings referred by a Probation Officer.

⁸ At times a youth may be screened for more than one placement on a single day. These records have been counted as duplicates and have been removed for analysis. Youth who are sent directly to placement as a court order have also been removed for analysis, though the trend appears in Figure 14.

Figure 15. Placement screenings by race

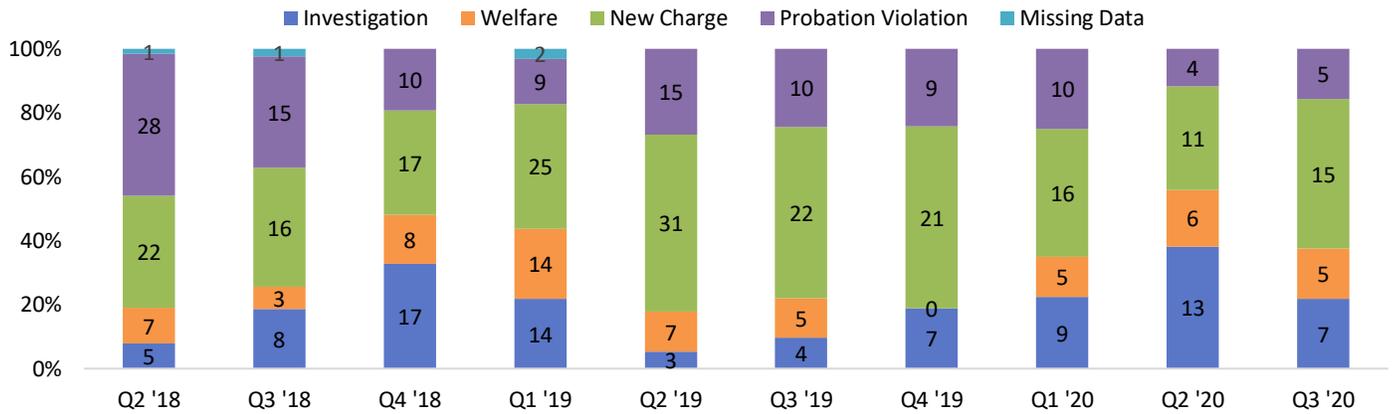

Placement screenings are conducted for several different reasons⁹. In Q3 2020, 7 (22%) were for an investigation, 15 screenings (47%) were conducted for a new charge, 5 (16%) were for a needs-based welfare screening, and 5 (16%) because of a probation violation¹⁰. Of the 5 clients screened for a probation violation, 3 were failed placements and 2 were failed community programming.

⁹ Staff began recording the reason for conducting placement screenings in Q3 2017, though it was infrequently recorded until Q3 2018. **Investigation:** Client is pending an Investigation event and is not already on probation; **Welfare:** Client’s placement is needs-based (housing need, closure of past placement, etc.); **New Charge:** Client has a new pending offense; **Probation Violation:** Client is being screened due to probation violations other than a new offense.

¹⁰ One client was screened twice.

Figure 16. Reason for placement screening

The following chart and table show the breakdown of placement screenings by race. Of the 32 screenings, 23 (72%) were youth who identified as Black/African American.

Figure 17. Placement admissions after screening by type and race

Staff began recording parental attendance at placement screenings in Q3 2018. To increase parent participation, parents were given the opportunity to attend via phone, beginning in Q4 2018. In Q3 2020 parents attended 44% (n = 27) of placement screenings.

Figure 18. Parental attendance at placement screening
