

SHAPE Fact Sheet

Children's Health & Well-being

Children from Minneapolis - South

SHAPE 2006 - Survey of the Health of All the Population and the Environment

Overview

This Fact Sheet provides a set of key indicators from the *SHAPE 2006 - Child Data Book* on the health and well-being of children from **Minneapolis - South**, including the **Southwest, Nokomis, and Calhoun-Isles Neighborhoods**. The SHAPE 2006 - Child Survey was developed with significant community input on the need to know more about children's well-being in Hennepin County. We asked over 4,000 parents (or "most knowledgeable adults") to tell us about a specific child in their household who was selected at random. For more information about the survey and the results for other groups of children in the county, please visit our website at: www.hennepin.us/SHAPE.

What did we ask parents to tell us about their children?

TOPICS		EXAMPLES
HEALTH	Overall Health & Health Conditions	<ul style="list-style-type: none"> ▪ Overall health ▪ Other chronic (on-going) health issues
	Health Insurance Coverage	<ul style="list-style-type: none"> ▪ Health insurance coverage ▪ Dental coverage

About the tables in this Fact Sheet:

These results are based on 637 children aged 0 to 17 from **Minneapolis - South**, including the **Southwest, Nokomis, and Calhoun-Isles** neighborhoods. The survey results are weighted to reflect the population characteristics of Hennepin County. The interpretation of these estimates is subject to the usual limitations associated with sample surveys including survey design, sample size and random error. Some estimates that may be especially sensitive to survey design effects have been noted. "Apparent" differences may not reflect "statistically significant" differences for groups of children. Statistically significant differences have been noted at the 95% confidence level ($p < 0.05$). Survey items are age-specific; the age range for each question has been provided. For more information or Fact Sheets for other groups of children within Hennepin County please visit our website at: www.hennepin.us/SHAPE.

Summary of key results for children from **Minneapolis - South**:

- ❖ Among children from Minneapolis - South, 9.6% of those who are aged 2 to 12 had 2 or more sugar-sweetened beverages yesterday (including fruit drinks, soda pop, or other sugar-sweetened drinks). Statistically, this rate is significantly lower than the rate for Hennepin County children overall ($p < 0.05$).
- ❖ Among children from Minneapolis - South, 64.6% of those who are aged 0 to 5 regularly receive child care by some one other than a parent or guardian. Statistically, this rate is significantly higher than the rate for Hennepin County children overall ($p < 0.05$).
- ❖ Among children from Minneapolis - South, 18.8% of those who are in grades 7 to 12 spend 10 or more hours during a typical school week hanging out with friends without adult supervision. Statistically, this rate is significantly lower than the rate for Hennepin County children overall ($p < 0.05$).
- ❖ Among children from Minneapolis - South, 77.9% of those who are aged 0 to 5 have family members who read books or tell stories to them every day. Among children from Minneapolis - South who are aged 3 to 5, 78.4% can write his or her own first name (even if some of the letters are backwards). Statistically, these rates are significantly higher than the rates for Hennepin County children overall ($p < 0.05$).
- ❖ Among children from Minneapolis - South, 82.0% of those who are in grades 1 to 12 meet the general guideline for their grade level for the amount of time spent reading or doing homework on a typical school day. Statistically, this rate is significantly higher than the rate for Hennepin County children overall ($p < 0.05$).
- ❖ Among children from Minneapolis - South, 69.5% of those who are aged 6 to 17 have had their parents talk to them about smoking or tobacco use 3 or more times in the past 12 months, and 61.5% of children from Minneapolis - South, who are aged 6 to 17, have had their parents talk to them about drinking or alcohol use 3 or more times in the past 12 months.
